***Think Local.* Nearshore Development.**
High performance options, how and when you need it.

Short on development staff because of layoffs or limited budgets?

Frustrated with offshoring options that don't fit your schedule?

***It's easier than ever to collaborate with our
US and Canadian teams!***

Your Time Zone

No more meetings at 5 am or 10 pm as with offshore models.

Our Communication

Get direct contact with our expert developers - no middle management to guard you from understanding progress and pitfalls.

Our Team Transparency

We know transparency earns your trust. When we say "yes", we mean "yes". If there is a problem, we solve it with you. We work with the sum of our strengths so clients gain more value in less time, with less risk.

How much does it cost?

Our rates begin at \$65 USD / hour. High performance teams range between role, skillset level and length of engagement.

4 ways to work with Imaginet

Blended Team, Client led

We work with developers or vendors selected by the client. The client has overall ownership of project delivery and we contribute specific services as part of a larger client-managed delivery team.

Blended Team, Imaginet led

In this model, Imaginet is responsible for more than architecture, sprint planning and project management. Client developers are assigned tasks based on a clear understanding of skills.

Turn Key

For clients with minimal technical resources, either because expertise doesn't exist or other projects are priority.

Staff Augmentation

Imaginet provides highly skilled technical resources for clients who simply need added capacity to a development team.

4 reasons to work with Imaginet

Rich Experience

Our global partners and clients include fortune 1000 companies, start-ups and enterprises. Regardless of your software needs, we create more value in less time, with less risk.

Innovation and Application Lifecycle Management (ALM)

Partner with Imaginet to access an ALM force who has completed over 1,100 consulting engagements and helped customers get value from source control builds and automated work item management.

High Performance Teams

Using our approach, our teams deliver rapid and reliable results, for small start-ups to worldwide enterprises.

Microsoft and Telerik Partnerships

Imaginet provides direct development services for both Microsoft and Telerik, and on their clients behalf. We have direct access to their development teams for support.
